PERSONAL PROJECTS

Home-Experts – Service Booking Platform
(04/2025 - 05/2025)

- Developed a full-stack service booking platform enabling users to schedule appointments with local electricians and plumbers based on real-time location filters.
- Built secure user and service provider authentication using JWT and implemented role-based dashboards for managing profiles and bookings.
- Integrated MongoDB to store structured data such as service listings, user profiles, and booking schedules.
- Designed a responsive React UI with Redux for state management to ensure a seamless user experience across all devices.
- Developed RESTful APIs using Node.js and Express.js for robust communication between the frontend and backend systems.

E-Com – Flipkart Clone (E-commerce Platform)
(02/2025 - 03/2025)

- Engineered a complete e-commerce platform with separate modules for customers, sellers, and admins to manage products, users, and orders.
- Implemented secure login and access control using JWT, with custom dashboards for each user role.
- Designed product and order management systems allowing sellers to publish/unpublish listings and customers to place and track orders.
- Built a scalable REST API architecture with Express.js and Node.js to handle business logic and client requests.
- Leveraged MongoDB to maintain all application data including product catalogs, user details, and transaction records.
